

# Simplify Email Compliance Management with GFI MailEssentials AI CoPilot

*Change the way you manage and ensure compliance within your organization's email.*

Introducing GFI MailEssentials AI CoPilot, a powerful AI assistant that understands your compliance needs in plain English and automates the creation of complex rules. Forget struggling with manual rules and regulations – Copilot ensures your email communications are secure and compliant with minimal effort.

- ✓ Automated Generation of Compliance Rules
- ✓ Sensitive Data Detection and Protection
- ✓ User-Friendly Natural Language Interface

## Key Features

- **Natural Language Interface:** Tell CoPilot your compliance needs in everyday language – no technical jargon needed.
- **Generative AI for Rule Creation:** CoPilot uses advanced AI models to automatically build and refine rules tailored to your business.
- **Regulation Identification:** Identifies the regulations that apply to your organization, based on your location and industry.
- **Sensitive Data Detection:** Detects and secures sensitive data in your email traffic, preventing potential breaches.
- **Rule Customization and Review:** Creates custom Regular Expressions (RegEx) rules, with accuracy double-checked by CoPilot.

### Challenge

### Solution

#### Complex Compliance Rule Management

Copilot automates rule creation and updates, making compliance far easier to manage.

#### Protecting Sensitive Information

Copilot pinpoints sensitive data, ensuring it's handled according to your compliance requirements.

#### Adhering to Relevant Regulations

Copilot stays updated on the latest regulations, so your business is always compliant.

#### Accessibility of Compliance Processes

Copilot's conversational interface eliminates the need for specialized technical knowledge.

*GFI MailEssentials AI Copilot streamlines email compliance with AI that understands your needs, automates rule creation, and keeps you a step ahead of regulations.*
